

**Notice about COVID-19 precautions regarding 3rd vaccinations & PCR tests**

(Please be sure to read this)

- We require that a 3rd vaccination has been taken 14 days before the start date of the camp. If the camper has received 3 vaccinations, please fax or email us a PDF of the vaccination certificate to us at least 3 days before the start of the camp.
  
- If you are not vaccinated, please take a PCR test and send us the results before arriving to the camp. If you want to take the PCR test through us, an extra 5,500 yen fee will be charged separately. If you cancel your participation in the pony camp after the test, the PCR test fee will not be refunded.

How the PCR test taken through us works:

**1. Camp application → Receive PCR kit by mail**

↓  
After enrolling to the camp, we will send a PCR test kit to your home. The kit will be delivered 1 - 2 weeks before the start date of the camp.

**2. Do the PCR test at home → Send the results via mail**

↓  
Take the PCR test at home and put the sampled results into the return envelope. Do not put a stamp on the return letter pack. Drop the return letter with the sample inside to a post box at least 5 days before the camp. (It may take up to 4 days until the inspection result is known.)

**3. We will contact you only if the test result is positive**

We will receive the test results, and contact you only if the test result is positive.

★ Those who take the PCR test by themselves, please take the test within 1 week from the start of the camp, and send us the results at least 3 days before the camp start date.

We are taking special precautions to prevent corona infections. To provide a safe and secure pony camp for all participants, please make sure that you have read and understood the following, and acknowledge to cooperate with us to prevent infections. We appreciate your understanding and cooperation in the measures.
